Zunft: pricing proposal

Research and proposal, 14 October 2026. All prices are **net** (without 19 % VAT) unless marked gross. Market prices come from comparison sites and vendor pages found today; please check the vendors' own pages before you rely on a number.

SHORT ANSWER

Charge **about 15 € per month for a solo craftsman**, **39 € for a team of up to 5** and **69 € for up to 10**, with two months free when paid yearly. That sits between simple invoicing tools (8–33 €) and full craft suites (35–80 €), while Zunft offers what invoicing tools do not: speaking a job instead of typing it, a calendar and time tracking. The costs per customer are small (about 1–2 € per person per month), so the margin is high; the real work is winning customers, not covering costs.

1. What the market charges

Product	Type	Price per month (net)	Note
sevDesk	Invoicing / bookkeeping	12.90 – 34.90	E-invoice (ZUGFeRD) from the cheapest plan; free plan with 3 invoices per month
Lexware Office	Invoicing / bookkeeping	7.90 – 32.90	Quotes and invoices from 12.90; e-invoice sending only in the 32.90 plan
Craftnote	Craft app, per user	14.90 – 49.90	Site documentation, chat, time tracking; invoices only in higher plans; 30-day trial
Hawepro	Craft software	35 – 39	Quotes, invoices, projects
Meisterwerk	Craft software, modular	from 59	3 users included, +15 per user; quotes and invoices +25; yearly saves 25 %
Plancraft	Craft software	59.90 – 74.90	Yearly vs monthly
HERO	Craft software	69 – 79	Measuring, material catalogue
ToolTime	Craft software	69 (solo), 145 (5), 279 (10)	7-day trial; extra people 29

Craft suites usually cost **35–80 € per month**; invoicing tools **8–33 €**. Competitors offer yearly discounts of about 10–25 %, and trials of 7–30 days.

2. Proposed plans

Plan	Included	Monthly	Yearly (per year)	Yearly per month
Solo	1 person	**14.90 €**	**149 €**	**12.42 €**
Team	up to 5 people	**39 €**	**390 €**	**32.50 €**
Betrieb	up to 10 people	**69 €**	**690 €**	**57.50 €**

- **Yearly = 10 months paid** (about 17 % off). With 19 % VAT the gross prices are: Solo 17.73 / 177.31, Team 46.41 / 464.10, Betrieb 82.11 / 821.10 €.
- Each plan includes everything: voice notes, receipts, calendar, time tracking, e-invoice, 13 languages, 1 GB storage per business. No feature tiers, which keeps it easy to explain and to build.
- **More than 10 people:** 6 € per extra person per month, or a custom price.

- **Trial:** 14 days free without a card (already built), then read-only until subscribed.
- **Pilot price (suggestion):** the first craftsmen get Solo for 9.90 € per month for as long as they stay. This rewards early users and gives you feedback and references.

3. What a customer costs us

Cost	Amount	Basis
Speech to text (Deepgram)	about 0.004 €/min	Pre-recorded Nova-3 about $0.0043 per minute
AI for positions and receipts (Gemini Flash-Lite)	fractions of a cent per note	$0.10 per million input tokens, $0.40 per million output tokens
Speech + AI per active person	about 0.50 – 1.50 €/month	Estimate: 60 voice notes of 1 minute and 20 receipts per month; heavier use stays under 2 €
Payment fee (Stripe)	0.35 € per SEPA debit 1.5 % + 0.25 € per EU card	About 2–3 % of a Solo payment
Fixed: database and hosting (Supabase Pro)	about 25 $/month	Enough for the first few hundred customers; storage is the part to watch
Fixed: other (domain, mail, Google Play once 25 $)	about 5 €/month	Apple (later): 99 $/year

Solo example: 14.90 € − 1.00 AI − 0.35 payment fee = about **13.50 € (90 %)** before fixed costs. **Team:** 39 − 5 × 1.00 − 0.35 = about **33.65 €**.

Break-even: fixed costs of about 30 € per month are covered by **3 solo customers**. Illustration (not a forecast): 50 Solo + 20 Team + 5 Betrieb on monthly billing is about 1,870 € revenue and 260 € costs, so about 1,600 € per month before your own taxes, support time and development.

4. Open points and risks

CHECK BEFORE YOU DECIDE

- **Google Play billing:** if subscriptions are sold inside the app, Google takes 15–30 %, which would turn Solo into about 12.70 €. Selling on our website and only reading the status in the app avoids this, but the rules are changing: read Google's current policy for your case first.
- **VAT:** prices are net because the customers are businesses. Whether *you* charge VAT depends on your own status (Kleinunternehmer or not): a question for your tax advisor.
- **Price sensitivity:** self-employed craftsmen compare against 8–13 € invoicing tools. Solo at 14.90 is only credible if the voice feature saves real time. The pilot will tell: if people hesitate, test 9.90 as the regular Solo price; if nobody hesitates, 19.90 is possible.
- **Storage and AI growth:** heavy users of receipts and recordings cost more; the 1 GB limit and the 90-day recording retention keep that in check.
- **Legal:** terms of service, cancellation rules (monthly vs yearly), and what happens to data after cancelling need the lawyer (To-Do, task 3).
